

# KarTent - Layout instructions

Here you will find instructions for correctly preparing print files for our products.  
Not quite sure? Send us an email to [webshop@kartent.com](mailto:webshop@kartent.com), together we'll figure it out!

## WHAT DO YOU NEED?

- 1x Template of your product
- 1x Adobe Illustrator
- 1x Your preferred print

## TEMPLATES

You can find our templates on  
[KarTent.com/templates](https://www.kartent.com/templates)

OR SCAN DE QR! →

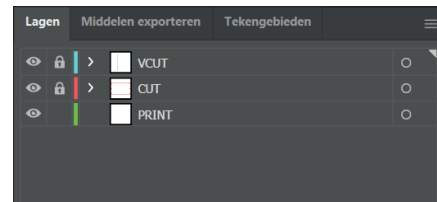

1. Download the template of your ordered product.

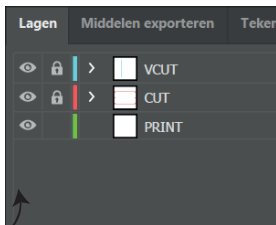

3. Go to window at the top and click on layers.

2. Open the template in Adobe Illustrator.

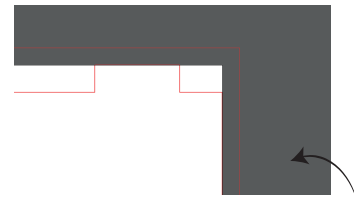

4. You will now see several layers:  
**CUT** = the cut line of the product for printing  
**VCUT** = the cut line for a special cutting technique  
**Print** = the layer in which your preferred print will be placed

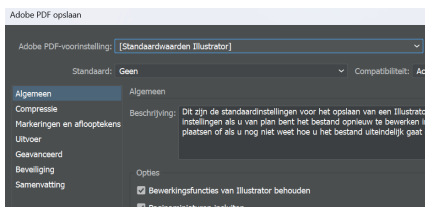

5. Leave the layers you don't need locked.

6. Add your design in the Print layer. Make sure your design has 1 cm margin. See red line. Then, lock the layer.

7. Save the files according to the standard values and make sure the edit functions **are** ticked though.

8. Send your files to [webshop@KarTent.com](mailto:webshop@kartent.com). Isn't something correct? We will get back to you as soon as possible!

Have fun with your personalized cardboard product! We are very curious how you have placed your product. If you would like to share a photo with us, we would love to receive it! Just send it to [webshop@kartent.com](mailto:webshop@kartent.com) or tag us on **Instagram!**
