

# GLASS BOX

## WHAT'S IN THE BOX?

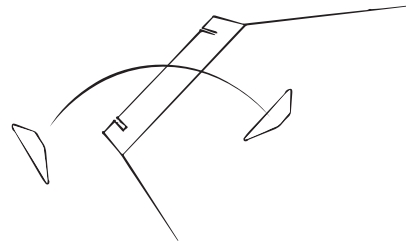

- 2x Part A
- 4x Part B
- 3x Part C
- 3x Part D
- 3x Part E

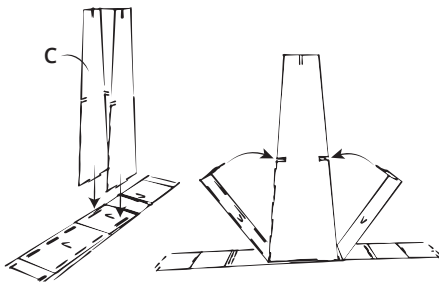

1. Make sure you have all the parts.

2. Break out the loose parts.

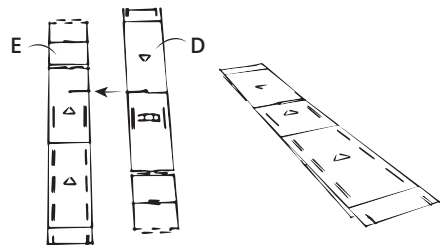

3. Carefully pre-fold all folding lines one time.

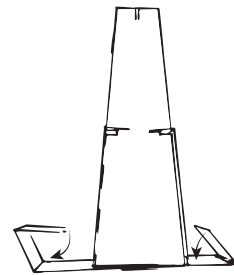

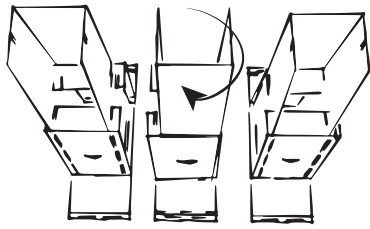

5. Then click part C on this and fold the ends into the incisions.

4. Slide part D into part E, where part E is placed on top as shown.

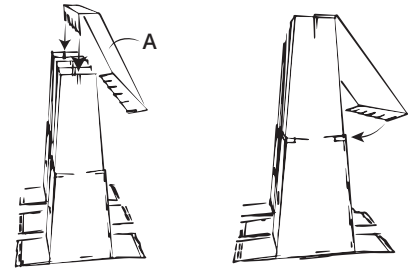

6. Fold the remaining ends inwards and then fold again so that it clamps against part C.

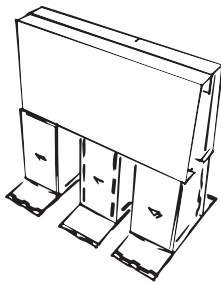

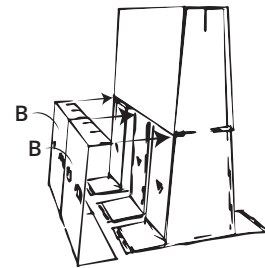

7. Repeat steps 4 to 6 twice more and place the three pillars next to each other with the middle one rotated 180°.

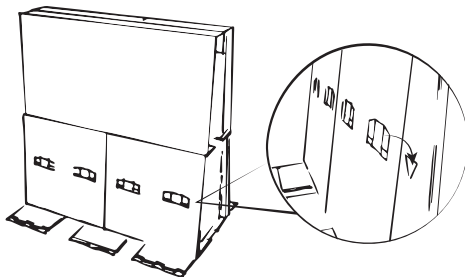

8. Slide part A with the side with two folding lines now into the upper recesses of the pillars. Then slide the other side into the middle of the pillars as well.

9. Repeat step 8 again for the other side of the pillars.

10. Slide parts B with the cutouts in the middle of the pillars. Part B fits next to each other twice.

11. Repeat step 10 again for the other side of the pillars and fold the handles into the cut-out triangles.
