

# HELVOIRT LAMP

## WHAT'S IN THE BOX?

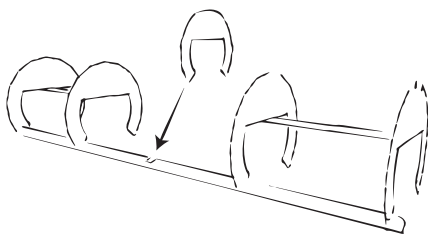

- 2x Side part A
- 1x Middle part B
- 30x Incision part C

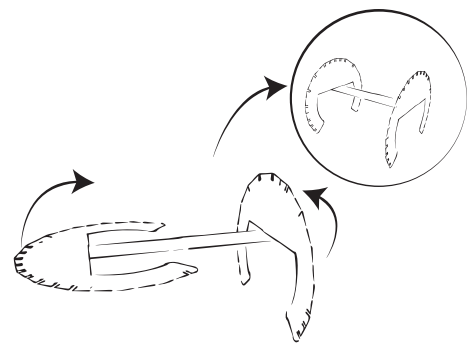

1. Make sure you have all the parts.

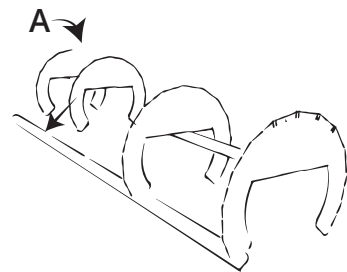

3. Then take part C and insert the first two incisions into the lowest incisions of part A.

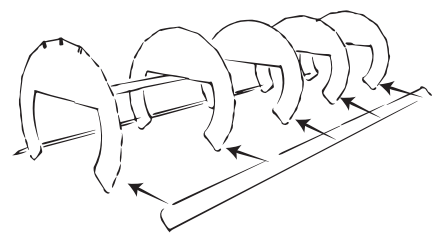

5. Put the lowest incision of part B in the middle incision of part C.

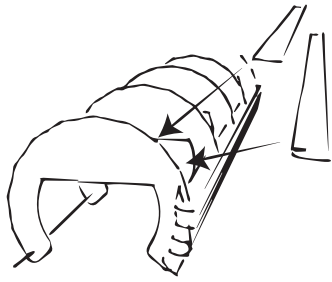

2. Take both parts A and fold the curved parts on the folding lines 90 degrees.

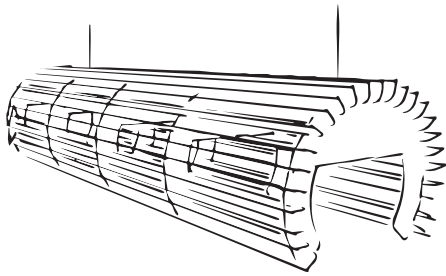

4. Then insert the lowest incision of the second part A into the last two incisions of part C.

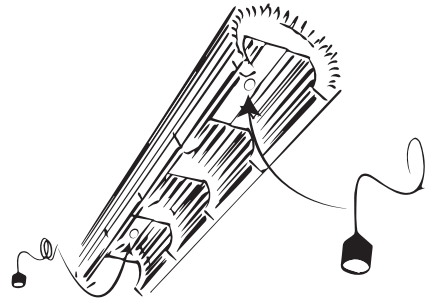

6. Take a second one of part C and place it in the incisions of part A and B on the other side.

7. Then do this with the rest of part C until all incisions are full. There are 5 parts C extra.

9. Now your lamp is finished!

8. Finally, put the two fittings from the bottom in the two holes of the lamp.
