WHAT'S IN THE BOX?

250x Click Part A

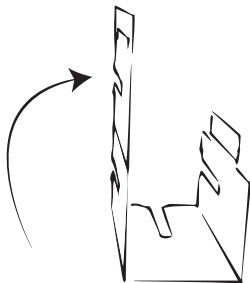

A 250x

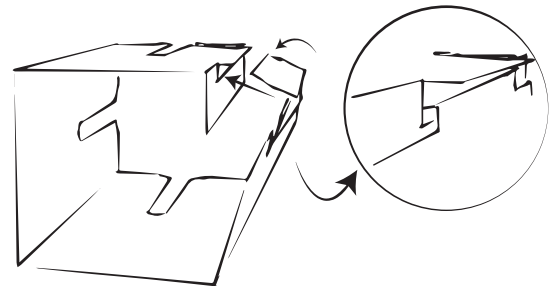

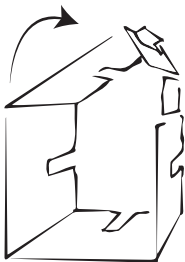

1. Make sure you have all 250 parts.

2. First, fold the rightmost plane on the folding line.

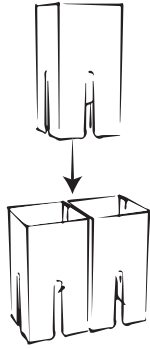

3. Then fold the two left planes 90 degrees.

4. Then you fold the small surface that is attached to it also 90 degrees.

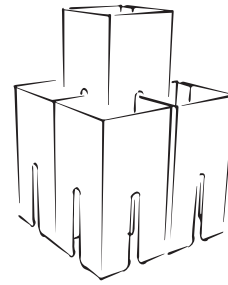

5. Fold the last plane also on the folding line.

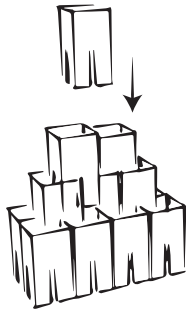

6. Then fold the small right surface 90 degrees and slide it into the slot of the planes to the left of it.

7. Put the piece down with the slots on the bottom and start building by putting pieces down and sliding others onto them.

8. For example, you can put four and then you place one in the middle at the intersection.

9. Build on until the pieces run out!
