

# TUSSENSCHOT

## WHAT'S IN THE BOX?

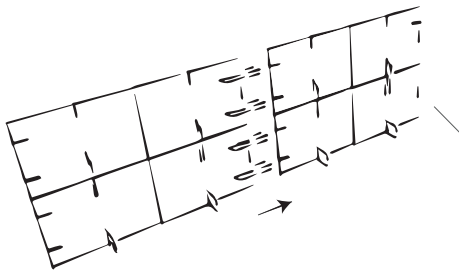

**Per partition:**  
4x Support A  
1x Partition B

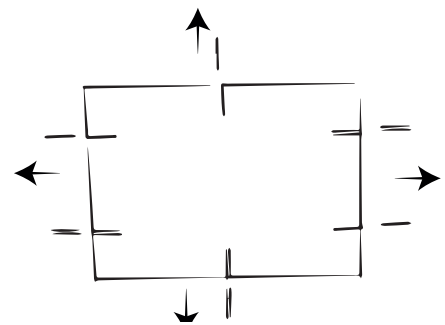

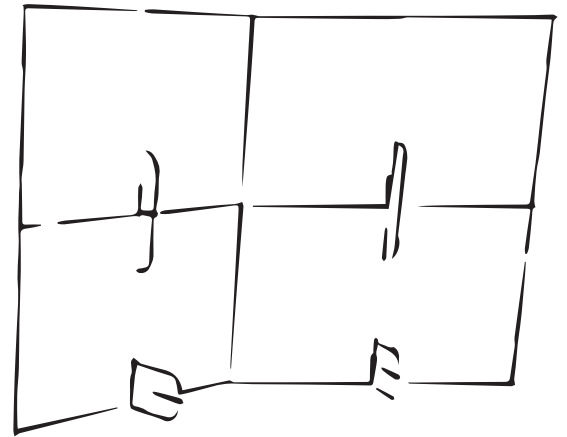

1. Check if you have all the parts.

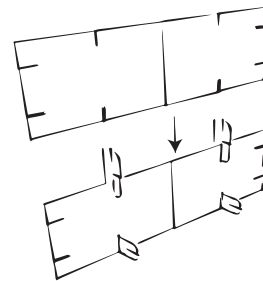

3. Slide support A into partition B so that the partition remains upright

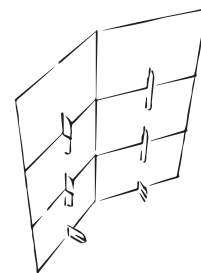

5. This way the partition can be made as high and wide as you want.

2. Only break the cardboard out of the necessary slots for a better result.

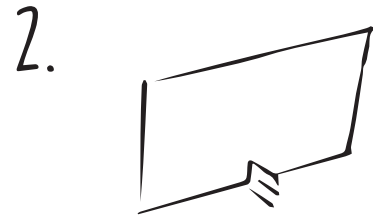

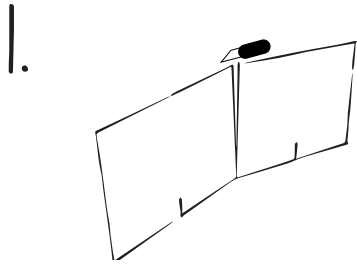

4. For a higher partition, slide support A and a new partition B together as shown in the image.

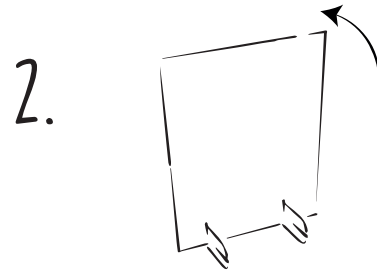

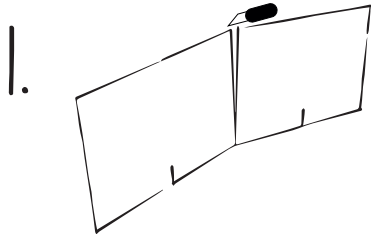

6. **NB!** If you make a partition of three or more panels on top of each other, place the partition in a bend.

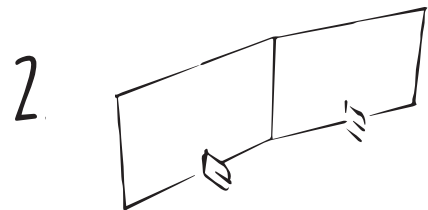

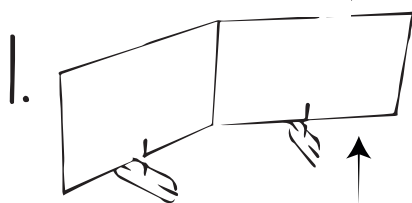

**Partition 65 x 97cm(1 panel)**

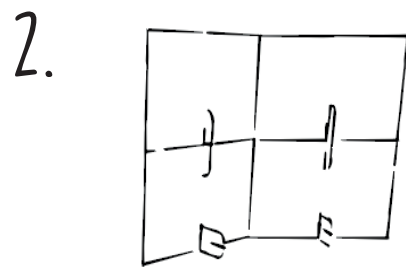

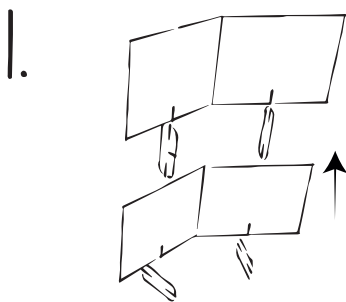

**Partition 97 x 65 cm(1 panel)**

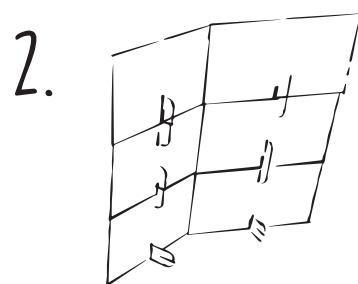

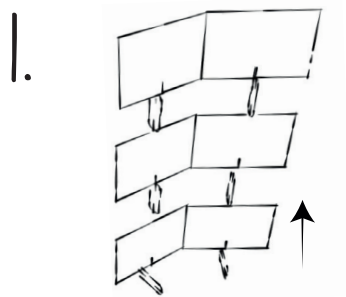

**Partition 194 x 65 cm(1 panel)**

**Partition 194 x 130 cm(2 panels)**

**Partition 194 x 195 cm(3 panels)**

**Your own size partition**

You can build the partition as high and wide as you want
