

# ROLL UP BANNER

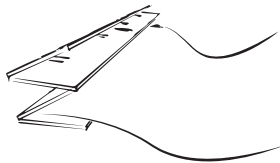

## WHAT'S IN THE BOX?

- 1x Base A
- 1x Banner B
- 1x Top bar C
- 1x Under bar D
- 1x Outside pole E
- 1x Above beam clamp F
- 1x Under joist clamp G
- 1x Inner post H

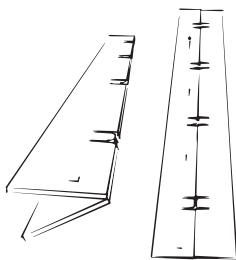

1. Check that you have all the parts.

2. Fold part C into an M shape as shown above.

3. Now lay C out so that the round holes are facing up. Now slide the banner with the print upwards, into the bottom opening. The banner only needs half the depth.

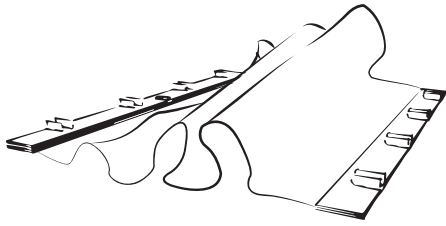

4. Take part F and press out the loose parts. Then fold up the sides of these parts, insert them into the slots of part C.

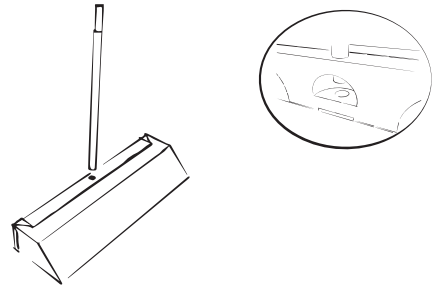

5. Take part D and fold it into a V-shape, then lay it out so that you can see the lines from above.

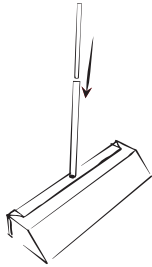

6. Now slide the banner up the slot of part D, to half the depth.

7. Take part G and repeat step 4.

8. Now take E and insert it into the hole from above. Make sure that the stick also goes through two flaps.

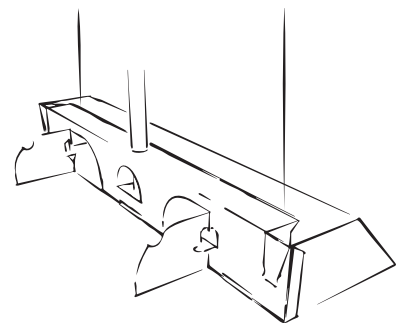

9. Put H in E, then put another E on top with an H in it, then place the last of E on top.

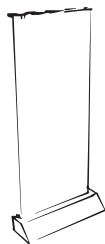

10. Take C and press it on the top of E.

11. Unhook the front of A and leave the banner hanging in it. Now close the front again so that the banner is nicely concealed.

12. Pull open the flaps at the back for more stability.

13. Now the banner is complete for you to behold.
